

Harry G. Sachsel

Certified Abrasive Engineer  
C.A.E., C.S.E., L.S.M.E.

Tech Brief TB064H20

- Variable Speed Drives
- Sony Digital read outs
- B Safe control systems
- Monitech computer control systems
- DIT HDP Coolant Nozzle System
- Rotary table w/sine plate
- Standard/fine pole magnetic chucks
- Dynamic wheel balancing systems
- Near dry lube systems (Unist)
- ITW lube systems (Acculube)
- CNC controls
- Opti dress fixtures
- J & S tangent/radius
- Dressing fixtures
- Angle and twin dressers
- Fine filtration systems
- Hydrostaic spindle and ways
- Flex stainless piping
- Upgrade consumables

## Related Systems and Equipment

We specialize in precision grinding equipment and related systems. Sales and service on new and used precision grinding machines... both domestic and foreign makes. Remanufactured and field service available. Parts for most precision grinding machine tools.

Fact is, you can often increase productivity, and thus profitability, with considerably less investment, by opting instead to upgrade, rebuild or remanufacture. Precision grinding machine tools of the past fifty years need to be upgraded in order to perform in a more productive up to date capability. This can be done with precision grinding related systems and equipment. This is what we can provide for you.
